

Article Reflection: Rubric

In this course you will turn in reflections written about five articles involving data analysis. Article reflections should be neat, organized, and reflections should be well communicated. Clear attempts to summarize the article briefly and to engage the article critically should be present.

Each article reflection will be worth 40 points and will be graded according to the following rubric:

Element	Description	Points possible
Neat and organized	Is the write-up neat and readable? Is it well-organized?	10
Communication	Have reasonable attempts been made to clearly communicate? Does the reflection use proper usage and grammar? Does the reflection use appropriate mathematical and statistical terminology?	10
Summary	Is a reasonable summary of the article present? Does it accurately describe the key points of the data analytic elements of the article?	10
Critical reflection	Is a critical reflection of the article present? Does the student critique the article's use of data analysis? Does the student reflect on possible alternative approaches?	10
		40 points
